## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Title: Liquid crystal on silicon display with micro color filters positioned on the top surface of the transparent substrate.

The following is an examiner's statement of reasons for allowance:

Nakamura et al (US 6727967) discloses (Fig. 18) a glass substrate (13) having a plurality of pixels arranged in a pixel array, a transparent substrate (14) positioned above the glass substrate (13), the transparent substrate (14) having a top surface and a bottom surface. A liquid crystal layer (15) positioned between the transparent substrate and the glass substrate. Color filters (72) positioned below the glass substrate (13).

Nakamura et al does not disclose a liquid crystal on silicon or that a plurality of micro color filters are on top of the transparent substrate (14).

Liao (US 20040095527) discloses a LCOS with color filters(241,242,243) located above the silicon substrate and not the transparent substrate (22).

Thus, details regarding the micro color filter positioned on the top surface of the transparent substrate of a liquid crystal on silicon structure do not closely
